About

Software Engineer on the web and the cloud since year 2000. From Single Page Applications to Streaming Data Pipelines, I love facing tough challenges, finding viable solutions and ensuring the highest level of quality.

Experience

42talents GmbH

Software Crafter

April 2020 - June 2020

(3 Months)

🌐 <https://42talents.com>

Software Crafter, trainer and coach for 42talents. Focused on frontend development, web performance, serverless architectures and extreme programming.

- Optimized the performance and SEO of the main website.
- Developed a Proof-of-Concept for a web shop with Strapi and a static site generator.
- Prepared teaching materials and introductions for workshops.

Homegate AG

Senior Software Engineer

August 2018 - March 2020

(1 Year, 8 Months)

🌐 <https://www.homegate.ch>

Homegate is one of the biggest marketplaces for properties and apartments in Switzerland.

- Worked on the reengineering of the Product Display Page and Search Alerts.
- Introduced new ideas into the teams to improve the effectiveness of our work, such as Pair Programming, Continuous Delivery and Trunk-Based Development
- Improved observability of the applications by introducing tools like Datadog and Sentry
- Worked on automation of all tasks, including production deployments and quality checks.
- Solved complex problems like Server-Side Rendering and Code Splitting in a serverless context.
- Helped the team split tasks in small deliverables with fast iterations.
- Took care of leading the technical decisions in collaboration with the rest of the team.
- Held a course on Webpack for the TX Academy.

siroop AG
Senior Software Engineer

February 2018 - July 2018
(6 Months)

🔗 <https://www.siroop.ch>

siroop was an online marketplace for Switzerland

- Worked on the streaming data pipeline for product and price updates from merchants.
- Rewrote Lambdas to process category information to simplify code and support additional languages.
- Refactored a Flask API to be able to switch between DynamoDB and Elasticsearch as source for data.
- Wrote an alternative consumer for product data reading from RabbitMQ.
- Took a leading role in the analysis, planning and implementation of the promotion concept.

Renuo AG
Full Stack Developer

November 2016 - February 2018
(1 Year, 4 Months)

🔗 <https://www.renuo.ch>

Renuo is a web agency specialized in Ruby on Rails and Angular. Among my duties and accomplishments are:

- The development of a Ruby on Rails and Angular 2 single page application for a big insurance company.
- I am in charge of all the servers, I cleaned them up and promoted a shift towards a serverless architecture.
- I train and help interns and junior developers through pair programming, live coding and presentations.

Vendini
Senior Software Engineer

July 2015 - September 2016
(1 Year, 3 Months)

🔗 <https://vendini.com/>

TeamSystem SpA
